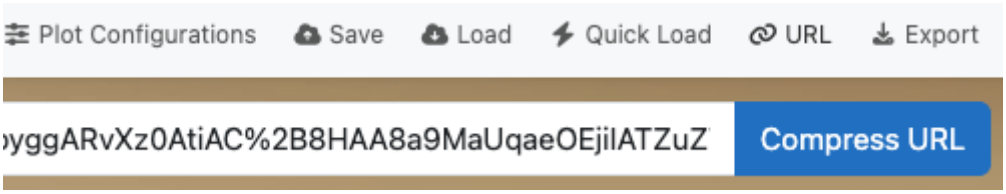
Sharing URLs



XINA makes it easy to share what you are looking at in XINA with other users. You can create a URL containing a link to XINA with all the selections you have made (start and end times, mnemonics, plot colors, etc. etc.) You can paste the URLs in emails or other sharing system so other XINA users can look at the exact same view you are seeing.

Click for video showing how to share a configuration using a URL that you can send to others
