

Transformations: Performing Calculations on Telemetry Data

Transformations ?

The screenshot shows a software interface for data transformations. At the top, there is a blue bar with a white plus sign. Below it is a menu with a red square icon and the word "Transformation". The menu is currently open, showing a list of options. The first option is "Value", which is highlighted in blue. Other options include Σ , Δ , $\Sigma\Delta$, $\%$, $\Sigma\%$, $\%\Delta$, $\Sigma\%\Delta$, and Δt . Below these are several mathematical symbols and operators: $\Sigma\Delta t$, Δ/t , $\Sigma\Delta/t$, $[\text{min}, \text{max}]$, $[0, \text{max}]$, \geq , $\geq\%$, \bar{y} , β , $+$, $-$, and \times . At the bottom of the menu, there are two more options: \div and π . The menu is closed by a blue bar with a white plus sign at the bottom.

Creating copies of mnemonics and making transformation by added a fixed value
