

# Secure Lab Enclave (SLE) Setup

The Secure Lab Enclave (SLE) is a private network accessible from the lab (B37/S118 for DraMS). GSE computers in the lab can be accessed remotely through the SLE.

1. Log into the SLE website with your NASA credentials: <https://sleaccess.sci.gsfc.nasa.gov/>
2. On Windows, open Remote Desktop Connection and enter the IP for the GSE computer you want to access:
  - GSE-1 - 10.171.37.130
  - GSE-2 - 10.171.37.131
  - GSE-3 - 10.171.37.132 (not currently accessible - it's located in the B11/E212 Electrical Lab)
