

Tagging a Marker Interval as debug

1. Go to oci.xina.io
2. Open the "OCI Intervals" tool (Tools --> OCI Intervals)
3. Change to the "Flight Model" (or the relevant model)
4. Under the "Search Markers" panel on the left side, find the marker(s) you want to tag as debug
5. For each marker, click the expand button

8. Click the Save Changes button. If the button is greyed out, you either didn't make any changes or there is a JSON syntax error.
9. You can hit escape or click outside of the modal box to close the marker popup
