View and download generated reports (aka packages)

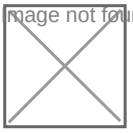

Reports that have already been generated can be downloaded using the packages tool.

You can download the report by clicking on the text in the `label` column.

You can filter the packages using the top search bar. For example, in the below image we've filtered the packages for the `FLT_DAU_FPA` profile.

You can filter by time range using the `Select Time Range` box on the left side. By default all packages are displayed.

Revision #1
