

View and download generated reports (aka packages)

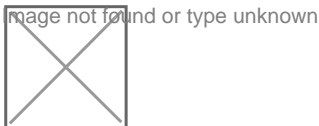

Reports that have already been generated can be downloaded using the [packages tool](#).

You can download the report by clicking on the text in the `label` column.

You can filter the packages using the top search bar. For example, in the below image we've filtered the packages for the `FLT_DAU_FPA` profile.

You can filter by time range using the `Select Time Range` box on the left side. By default all packages are displayed.

Revision #1
