# XINA Import Helper

XINA Import Helper is a utility for generating the XINA API actions as JSON files for an archive directory. The following XINA action files will be generated:

- Cancel any existing task(s) for the archive
- Delete the archive if it already exists in XINA
- Import the file archive
- Run the mining task on the archive to extract the data

The output files can then be imported into XINA using XINA Import. This application is distributed as a Java jar file and requires Java 17 or greater to run. The recommended OpenJDK build is available here.

# Latest Version

## XINA Import Helper 11.2.3

Download

Windows

```
java -jar "path to xina-import-helper.jar" ^
    [additional arguments...]
```

MacOS, Linux

```
java -jar "path to xina-import-helper.jar" \
    [additional arguments...]
```
